## **KET-DIM-100**

## Wireless control module with 0-10 V output

• Device control with 0-10 V input

- Designed for road applications
- Integrated repeater function
- Extended radio range

KET-DIM-100 is the wireless analog control module that enables effective remote control of a wide range of devices, including lamps, pumps, and motors, equipped with a standard **0-10 V** regulation input. Its wireless technology simplifies installation and offers greater flexibility in device control. Its **small dimensions** make it ideal for integration within lighting fixtures such as ceiling lights and street lamps, maintaining a compact and discreet design. The protective resin coating?ensures reliable operation even in the presence of vibrations and temperature fluctuations, guaranteeing greater durability over time. Thanks to the integrated repeater function and the amplified radio, the KET-DIM-100 allows for easy and cost-effective extension of the range and reliability of the X-Monitor network, fully leveraging the benefits of IEEE 802.15.4 wireless communication.
